(a) Record, data, smooth inversions
Preserved thickness (m)
Time (Myr)
True preserved record
λ=0.1
λ=1
λ=10
λ=100
Dated horizons (2σt)
(b) Admissible gross mass
Count
Gross deposited mass Mgross (m)
True Mgross
Admissible median
(c) Admissible preservation efficiency
Count
Preservation efficiency P
True P
Admissible median
(d) Misfit vs smoothing
Reduced χ2
Smoothing weight λ
